(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a face view of a first image of a display screen with transitional graphical user interface, showing my new design; and,

FIG. **2** is a face view of a second image thereof.

The display screen shown in FIGS. **1** and **2** in an irregularly broken line style forms no part of the claimed design. The text and logo in the remaining broken lines and the areas within shown in FIGS. **1** and **2** form no part of the claimed design. The appearance of the transitional user interface sequentially transitions between the images shown in FIGS. **1** and **2**, where content presented in a first portion of the display illustrated in FIG. **1** appears within a box in a second portion of the display illustrated in FIG. **2**. The process or period in which one image transitions to another image forms no part of the claimed design.
