The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a first image in a sequence for a display screen with transitional graphical user interface according to the claimed design;
FIG. **2** is a front view of a second image thereof; and,
FIG. **3** is a front view of third image thereof.
The appearance of the transition is sequential from FIG. **1** to FIG. **2** to FIG. **3**. The process or period in which an image transitions to another image forms no part of the claimed design.
Shading indicates a contrast in appearance.
