(57) **CLAIM**

The ornamental design for portion of a display panel with a user interface component, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a portion of a display panel with a user interface component showing a first image in a sequence according to a first embodiment of my new design;
FIG. **2** is a front view of a second image thereof in the sequence of the first embodiment;
FIG. **3** is a front view of a portion of a display panel with a user interface component showing a first image in a sequence according to a second embodiment of my new design; and,
FIG. **4** is a front view of a second image thereof in the sequence of the second embodiment.
The subject matter in this patent includes a process or period during which a user interface component sequentially transitions between images shown in the respective embodiments. This process or period in which one image transitions into another forms no part of the claimed design.
The broken lines including the showing of a portion of a display panel of a communications terminal surrounding the illustrated user interface are included for the purpose of illustrating environmental structure and form no part of the claimed design.
