

C. Fanshaw.
Self-adjusting Stock.

N^o 4788.

Patented Oct. 3. 1846

FIG. 1.

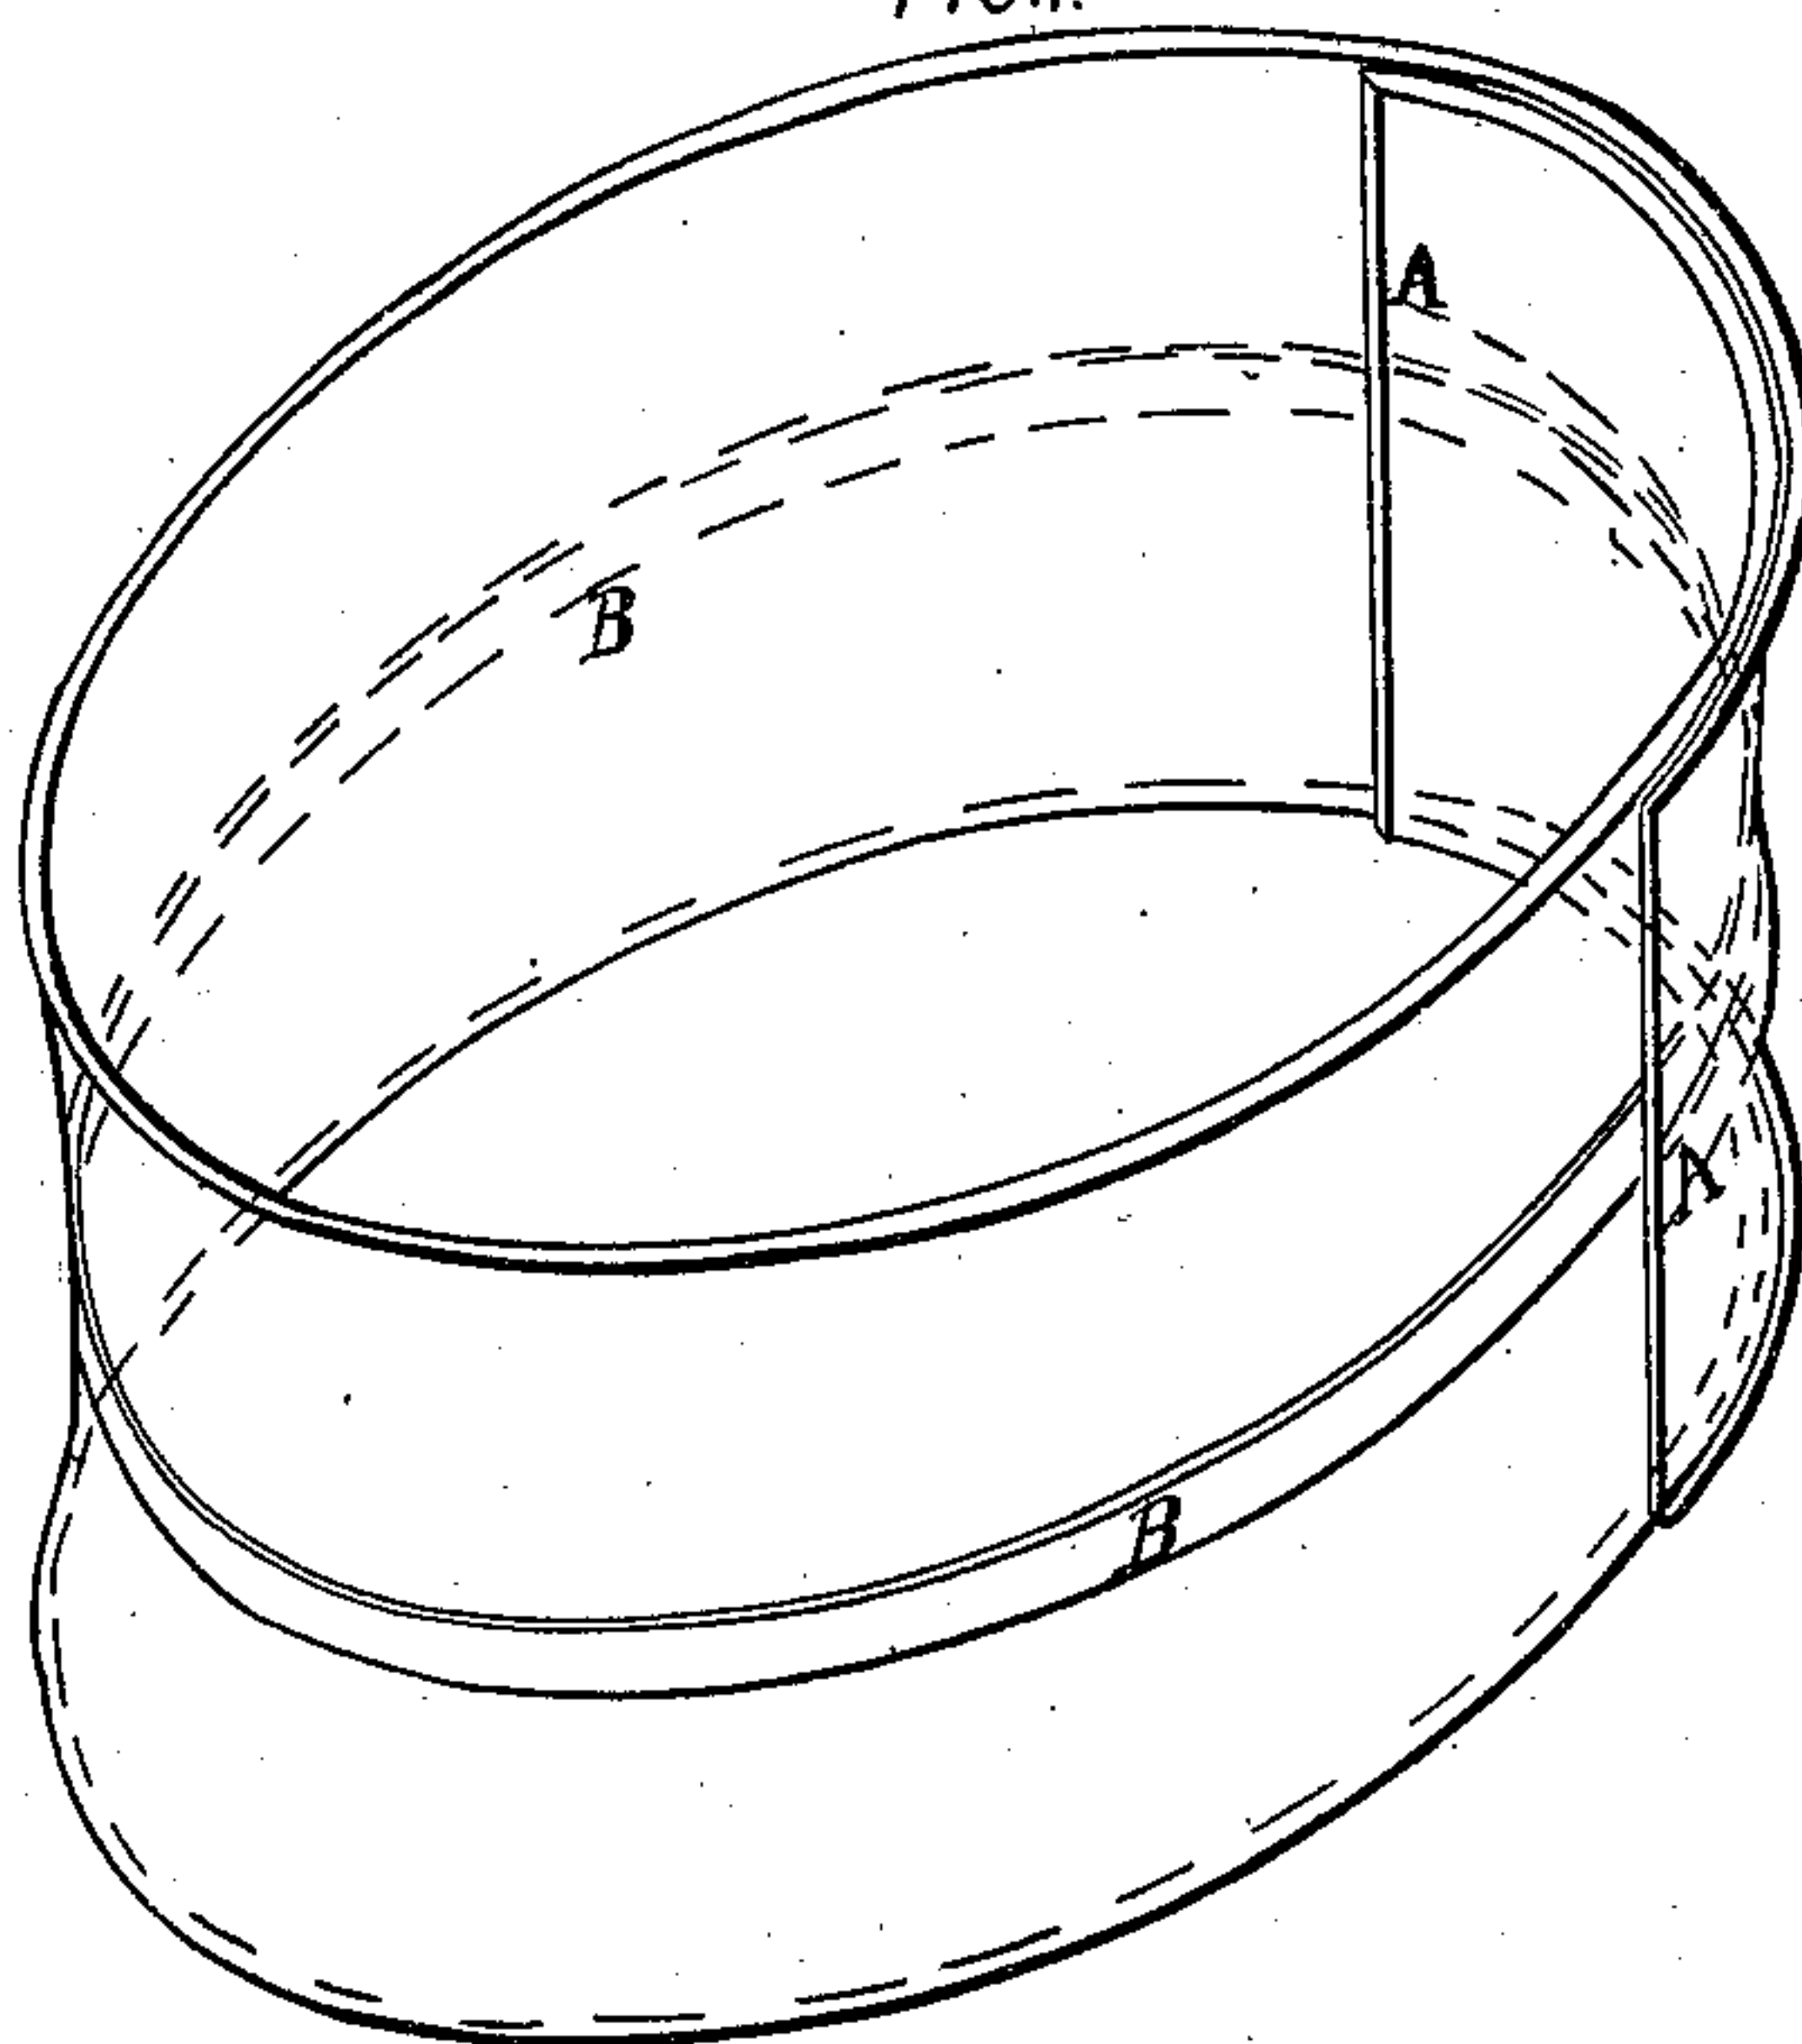

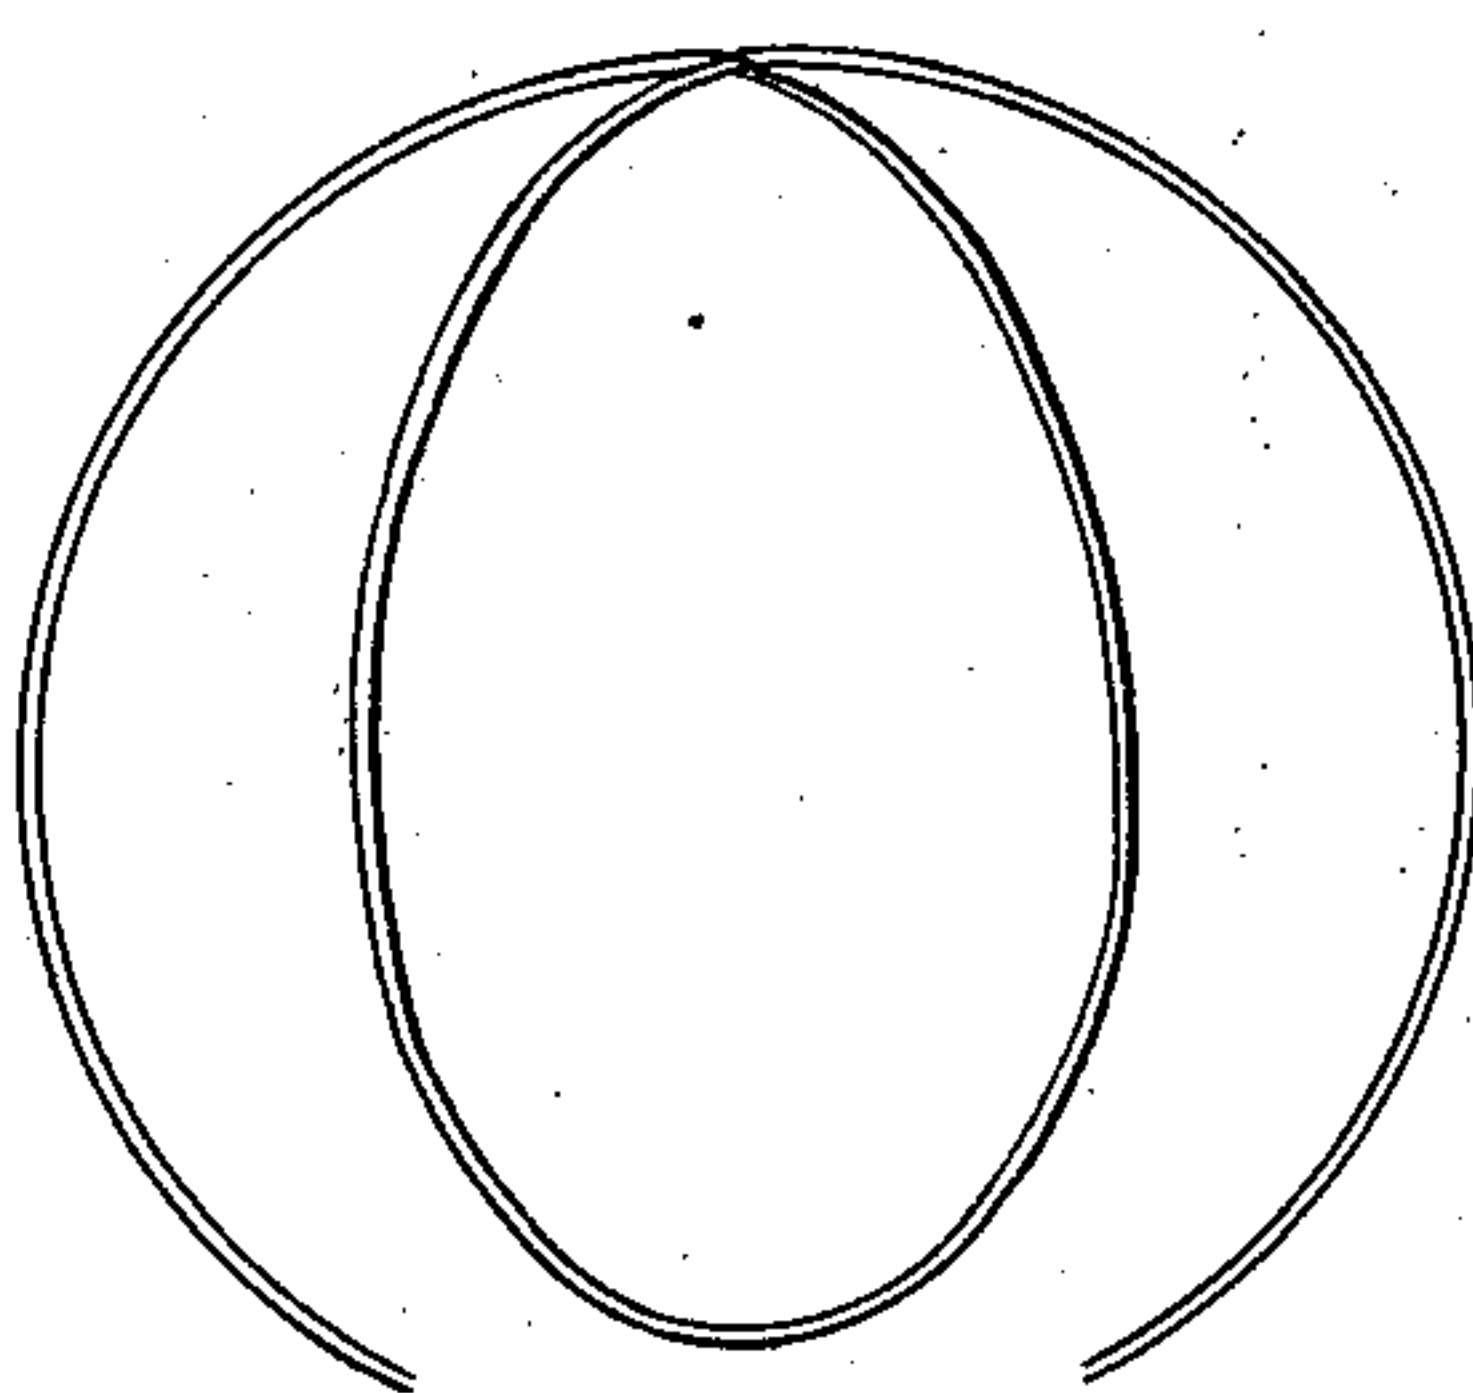

FIG. 2.

UNITED STATES PATENT OFFICE.

CHARLES FANSHAW, OF NEW YORK, N. Y.

NECK-STOCK.

Specification of Letters Patent No. 4,788, dated October 3, 1846.

To all whom it may concern:

Be it known that I, CHARLES FANSHAW, of the city, county, and State of New York, have invented a new and Improved Mode of
5 Securing to the Neck a Stock and for a More Perfect Adjustment of the Same; and I do hereby declare that the following is a full and exact description, reference being had to the annexed drawing and making part of this specification.

Figure 1 represents a stock frame; and the metallic band or spring B, B, sewed, or otherwise secured to the middle, or center portion, of the stock frame, and parallel
15 with the edges of the frame, the ends of the spring terminating at or near A, A. The object of the spring (which is made of any suitable material) is to dispense with the buckle, or other fastening and also to
20 secure the stock more comfortably to the neck of the wearer, at the same time 'tis more easily put on and taken from the neck, than any other hitherto invented.

In the drawing the stock is represented ex-

panded about to the degree desirable when 25 in use upon the neck of the wearer—when not in use, the elastic nature of the spring will considerably contract the form of the stock from that represented in Fig. 1, not needful to be represented by a sketch; Fig. 30 2, represents a plan view of one of the springs: this spring after being properly tempered for this purpose will assume the form (or nearly so) as represented, and it is desirable that springs for this purpose; 35 be very perfectly tempered and very elastic, otherwise they will be broken in putting them on the neck or removing them from it.

What I claim as new and of my invention and desire to secure by Letters Patent is— 40

The introduction and application of an elastic metallic or other band to a stock frame for the neck, for the purposes as herein substantially set forth.

CHARLES FANSHAW.
