Inventor
John Gault.

UNITED STATES PATENT OFFICE.

JOHN GAULT, OF BOSTON, MASSACHUSETTS.

COMBINATION OF ERASER AND ERASER-SHARPENER.

Specification forming part of Letters Patent No. 33,304, dated September 17, 1861.

To all whom it may concern:

Be it known that I, JOHN GAULT, of Boston, Suffolk county, Massachusetts, have invented a new and Improved Mode of Combining Pencil-Erasers and Eraser-Sharpener in the Same Instrument; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings and the letters of reference marked thereon, in which the same letter represents the same thing in each figure.

My invention consists in combining prepared india-rubber, in the form usually adopted for erasing pencil-marks, with an Arkansas or other whetstone and any kind of leather suitable for strapping or giving a fine edge to steel.

Figure 1 represents a side view showing the hone A. Fig. 2 represents a side view showing the strap B. Fig. 3 represents the edge. Fig. 4 represents a sectional cut view showing the hone embedded in the india-rubber and strap attached on the opposite side.

To enable others to make and use my invention, I will describe its construction.

Into an ordinary piece of prepared rubber, of size convenient for the counting-room, I embed a narrow piece of Arkansas or other whetstone, and upon the other side of the rubber I permanently attach a narrow piece of leather suitable to sharpen a knife-blade. The rubber may be surrounded by a leather or any desired protection for the fingers, leaving the ends of the rubber free and the hone and strap both slightly elevated above the surface of both the rubber and leather or other shield for the fingers.

What I claim, and desire to secure by Letters Patent, is—

The combination of an india-rubber pencil-eraser with a whetstone and strap, in the manner and for the purposes described.

JOHN GAULT.
