United States Patent Office.

SAMUEL JARDEN, OF BALTIMORE, MARYLAND.

ODORIZED KEROSENE-OIL.

Specification forming part of Letters Patent No. 34,577, dated March 4, 1862.

To all whom it may concern:

Be it known that I, SAMUEL JARDEN, of Baltimore city, in the State of Maryland, have invented a new and improved mode of combining certain materials with kerosene-oil for the purpose of disguising the disagreeable odor of the said oil; and I do hereby declare that the following is a full and accurate description thereof.

The nature of my invention consists of a combination of certain odorous oils that will mingle chemically with the said kerosene-oil, and thereby perfume the said oil.

To enable others skilled in the art to make and use my invention, I will proceed to describe its combination and operation.

I mix a preparation consisting of one-fifth of an ounce each of oil of lavender, oil of cin-

namon, oil of bergamot, oil of lemon, and oil of rosemary with five (5) gallons of keroseneoil, which said oils form a chemical combination with said kerosene-oil and disguise its odor, making a new and agreeable odor in its place.

What I claim as my invention, and desire to secure by Letters Patent, is—

The manner of odorizing kerosene-oil as above stated, or by combination with said essential oils in greater or less proportions, if the said manner of odorizing be substantially the same.

SAMUEL JARDEN.
