UNITED STATES PATENT OFFICE.

AUGUSTUS J. OHMER, OF HAMILTON, OHIO.

IMPROVED PORTABLE SODA-FOUNTAIN.

Specification forming part of Letters Patent No. 52,069, dated January 16, 1866.

To all whom it may concern:

Be it known that I, AUGUSTUS J. OHMER, of Hamilton, Butler county, Ohio, have invented a new and useful Improvement in Portable Soda or Refreshment Fountains; and I do hereby declare the following to be a full, clear, and exact description thereof, reference being had to the accompanying drawings, making part of this specification.

My invention is designed for portable fountains; and it consists in a provision for cooling of the liquor as it escapes from the vessel.

Figure 1 is a perspective view of a fountain embodying my invention. Fig. 2 is an axial section of the same.

To the top or other convenient part of a portable fountain, A, substantially such as that patented to me on the 22d day of November, 1864, I secure a chamber, B, for the reception of ice or other cooling substance, and called by me the "refrigerator." The pipe C,

through which the fountain is charged and discharged, is made to enter and coil or wind about in the refrigerator B, and to pass out through the side or other suitable part thereof, and to terminate in a customary nozzle, D. E is a cover to the refrigerator.

The refrigerator may be made detachable from or be brazed or seamed permanently to the fountain, and may be located at the bottom or side, or within the latter.

I claim herein as new and of my invention—

Combining with a portable refreshment-fountain the refrigerator B, traversed by the discharge-pipe C, in the manner substantially as set forth.

In testimony of which invention I hereunto set my hand.

A. J. OHMER.
