Inventor.

George Murray.

United States Patent Office.

GEORGE MURRAY, OF CAMBRIDGEPORT, MASSACHUSETTS.

Letters Patent No. 62,284, dated February 19, 1867.

IMPROVEMENT IN STILTS.

The Schedule referred to in these Letters Patent and making part of the same.

TO ALL WHOM IT MAY CONCERN:

Be it known that I, GEORGE MURRAY, of Cambridgeport, in the county of Middlesex, in the State of Massachusetts, have invented a new and improved Stilt for children's toy; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings and to the letters of reference marked thereon.

The nature of my invention consists in having a standard of wood, with a movable step or stirrup fitted to slide up or down on the standard to different points that are desirable, thus enabling any person to have a high or low stilt with the same standard.

To enable others skilled in the art to make and use my invention, I will proceed to describe its construction and operation.

I make a standard, B, of wood, with notches C C inserted on one side, as far up as may be desirable, the same as shown in Figure 1, which is a sectional view of my invention. I then form a sleeve, D, with a step, three sides of metal, with the step E of wood, which is held to its place by a rivet, or its equivalent, as shown at I in Figure 2. On the bottom of the step is a lip, A, fitted so as to enter the notches C, as shown in fig. 1. On the back side of the step, bearing against the standard, is a spring, S, attached, which keeps the lip A into the notches C, thereby securing a step by the raising or lowering of the sleeve at any point desired. It will be seen by fitting the spring on the back of the step at the top, pressing against the standard, that it will keep the lip at the bottom pressed securely into the notch in the standard, as desired.

What I claim as my invention, and desire to secure by Letters Patent, is—

The movable step, as described, in combination with the standard, for the object specified.

GEORGE MURRAY.
