United States Patent Office.

CHARLOTTE W. ALLEN, OF NEWPORT, KENTUCKY.

Letters Patent No. 62,800, dated March 12, 1867; antedated February 28, 1867.

IMPROVED SMOOTHING-IRON STAND.

The Schedule referred to in these Letters Patent and making part of the same.

Be it known that I, CHARLOTTE W. ALLEN, of Newport, Campbell county, in the State of Kentucky, have invented a new and useful Smoothing-Iron Stand, which is intended to secure greater safety and convenience in ironing clothes; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon, which drawings form a part of this specification, and in which—

Figure 1 is a top view; and

Figure 2 is an end view.

The nature of my invention consists in providing said smoothing-iron stand with an elevated rim or guard, A, as seen in fig. 1, extending round the sides, and a back rim or guard, B, which said rims A and B serve to prevent the smoothing-iron from slipping or falling from said ironing stand. The rim or guard B (as seen in fig. 2) is made lower than guard A, in order to facilitate more readily the insertion of the smoothing-iron within said stand; and my invention consists, further, in the application to said smoothing-iron stand of a clamp, C, and a thumb-screw, D, attached thereto, and both of which are illustrated in fig. 2, and by means of which said clamp and screw said iron-stand may be firmly secured to the edge of a table or shelf.

What I claim as my invention, and desire to secure by Letters Patent, is—

The smoothing-iron stand, consisting of the guard or rim A B, and the screw-clamp C D, combined and arranged substantially as and for the purpose specified.

CHARLOTTE W. ALLEN.
