FREDERICK KOPPENFELS AND GUSTAV BRUECK, OF NEW YORK, N. Y.

Letters Patent No. 63,396, dated April 2, 1867.

IMPROVEMENT IN FANS.

The Schedule referred to in these Letters Patent and making part of the same.

TO ALL WHOM IT MAY CONCERN:

Be it known that we, FREDERICK KOPPENFELS and GUSTAV BRUECK, of the city and State of New York, have invented and made a certain new and useful Combined Fan and Perfumed Sachet; and we do hereby declare the following to be a full, clear, and exact description of the said invention, reference being had to the annexed drawing, making part of this specification, wherein we have represented a vertical section of said fan and perfumed sachet.

This invention consists in a perfumed sachet, introduced into the material of which the fan is composed, so that said sachet is excluded from view, but the perfume therefrom gives fragrance to the air wafted to the person by the alternations of the fan.

In the drawing, *a* represents the body of the fan, *b* the handle, *c* the perfumed sachet, made to contain any desired fragrant material; *d* is a disk of material corresponding to the rest of the fan, placed over said perfumed sachet, and secured around its edges to the surface of the fan. Ornaments of paper or other material may be placed around the disk *d*, at its junction with the surface of the fan.

This perfumed sachet and fan combined is a new, useful, elegant, and acceptable article of manufacture.

What we claim, and desire to secure by Letters Patent, is—

The combined fan and perfumed sachet, constructed as specified, as a new article of manufacture.

In witness whereof we have hereunto set our signatures this twenty-ninth day of December, A. D. 1866.

FREDERICK KOPPENFELS,
GUSTAV BRUECK.
