Inventor:

Meritt Gally
Marion Wayne Co,
N. Y.

United States Patent Office.

MERRITT GALLY, OF MARION, ASSIGNOR TO ORRIS POTTER AND FRED-
ERICK GRANDIN, OF WALWORTH, NEW YORK.

Letters Patent No. 68,729, dated September 10, 1867.

IMPROVED EVENER FOR WHIFFLE-TREE.

The Schedule referred to in these Letters Patent and making part of the same.

TO ALL WHOM IT MAY CONCERN:

Be it known that I, MERRITT GALLY, of Marion, in Wayne county, and State of New York, have invented a new Improvement in "Evener" for Whiffle-Trees, &c.; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings and to the letters of reference marked thereon.

My invention consists in an additional improvement on "evener" for which Letters Patent were granted to me, and issued on the 26th day of March, 1867, and numbered 63,238.

A represents the body of the evener, and C C lever projections, as in former patent. E' E' represent curved projections of the body of the evener substituted for the stops E E of former patent, and allowing the use of short straps or chains instead of the inflexible bars B B' of former patent. S S represent additional clevises pivoted to the extremities of the lever projections C C for the attachment of straps or chains, preserving the advantages over the "strap and pulley."

What I claim as my invention, and desire to secure by Letters Patent, is—

The curved projections of the body of the evener E' E', the pivoted clevises, for the attachment of straps or chains, in combination with the lever projections C C, and constructed as herein set forth.

MERRITT GALLY.
