Geo. P. Kings

Inventor,
Horace Harris

United States Patent Office.

HORACE HARRIS, OF NEWARK, NEW JERSEY.

Letters Patent No. 68,739, dated September 10, 1867; antedated September 7, 1867.

IMPROVED MOSQUITO-GUARD.

The Schedule referred to in these Letters Patent and making part of the same.

TO ALL WHOM IT MAY CONCERN:

Be it known that I, HORACE HARRIS, of Newark, in the county of Essex, and State of New Jersey, have invented a new and improved Mosquito-Guard; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon.

My invention consists in making a frame, A, of wire, or other equivalent material, to rest on the top of the head, and held there by the strings B B, or otherwise. A part of the frame, C, is projected out in front, which is bent down about to the point of the nose. The frame and projection are covered with netting, D, the projection keeping it out of the face when in use.

I have, therefore, in this simple manner secured a very important object, viz, perfect protection of the face from mosquitoes, with no annoyance to the wearer, and with a trifling expense.

What I claim as my invention, and desire to secure by Letters Patent, is—

The frame A, made of wire, or other equivalent material, secured to the top of the head by the strings B B, or otherwise, and the projection C in front, in combination with the netting D, substantially in the manner and for the purpose specified.

HORACE HARRIS.
