Inventor.

United States Patent Office.

EMANUEL BRUNSWICK, OF CHICAGO, ILLINOIS.

Letters Patent No. 72,969, dated January 7, 1868.

BILLIARD-CUE RACK.

The Schedule referred to in these Letters Patent and making part of the same.

TO ALL WHOM IT MAY CONCERN:

Be it known that I, E. BRUNSWICK, of the city of Chicago, in the county of Cook, State of Illinois, have invented new and useful Improvements in Billiard-Cue Racks; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings, making part of this specification, in which—

Drawing No. 1 represents the plain revolving cue-rack, and

Drawing No. 2 represents the lock-up rack for private use.

The nature of my invention consists in making the billiard-cue rack so arranged that it may revolve and be detached from the wall.

To enable others skilled in the art to make and use my invention, I will proceed to describe its construction and operation.

Two circular plates, A and B, (Drawing No. 1,) are firmly secured to a vertical shaft, C. The lower plate, A, is provided with a rim, *a*, at its outer edge, to prevent the butt-ends of the cues from slipping off the plate; and the upper plate, B, is provided with several openings, through which the points of the cues are passed. Each plate is provided with a metallic pin, D, which enters a metallic socket, E, inlaid in the stationary brackets F F, and revolve in it. The brackets are secured to a wall, a pillar, or any other object, and support the rack.

I make private cue-racks, (Drawing No. 2,) in which the lower plate, A, forms a bottom to a round box, B, open on top, and divided into compartments C C, by partitions *p p*, each compartment having a door, D, hung on hinges, and provided with a lock and key. The upper plate, E, forms a bottom to the box B, and is provided with several holes. The rack, being revolving, is very convenient for handling the cues.

What I claim as my invention, and desire to secure by Letters Patent, is—

The revolving billiard-cue rack, constructed and operating substantially as and in the manner herein described and specified.

EMANUEL BRUNSWICK.
