

UNITED STATES PATENT OFFICE.

LEVI S. ENOS, OF CHICAGO, ILLINOIS.

IMPROVED METALLIC ROOFING.

Specification forming part of Letters Patent No. 85,806, dated January 12, 1869.

To all whom it may concern:

Be it known that I, LEVI S. ENOS, of Chicago, in the county of Cook, and in the State of Illinois, have invented certain new and useful Improvements in Metallic Roofing; and do hereby declare that the following is a full, clear, and exact description thereof.

The nature of my invention consists in the combination of block-tin and lead for metallic roofing, which will be much cheaper and more durable than any metallic roofing now in use.

The proportions of the ingredients are as follows, viz: one-fourth of a pound block-tin to one pound lead, or one part block-tin to four parts of lead.

In cases where a finer compound is required,

I may use the metals in equal proportions, part for part.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is—

As an article of manufacture, a metallic roofing composed entirely of block-tin and lead, substantially as herein set forth.

In testimony that I claim the foregoing I have hereunto set my hand this 31st day of August, 1868.

LEVI S. ENOS.

Witnesses:

EDWARD J. WHITEHEAD,
EDWARD S. HAYDEN.
