NATHAN ROSE, OF BELMONT, NEW YORK.

Letters Patent No. 92,369, dated July 6, 1869.

IMPROVED MILL-PICK HANDLE.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, NATHAN ROSE, of Belmont, in the county of Allegany, and State of New York, have invented certain new and useful Improvements in Pick-Handles; and I do hereby declare that the following is a full, clear, and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon, which form a part of this specification, and in which—

Figure 1 represents a perspective of the pick-handle;

Figure 2, a plan view, with triangular clamp removed; and

Figure 3, a perspective view of the triangular clamp removed.

Similar letters indicate like parts in all the figures.

My invention relates to improvements in pick-handles; and to this end,

It consists in a handle provided with a triangular clamp, as and for the purpose hereinafter specified.

To enable others skilled in the art to which my invention appertains, to make and use the same, I will now describe its construction and operation.

In the accompanying drawings—

A represents the handle, made in the usual shape, and provided at one end with the mortise *a*.

This mortise is made to form an acute angle at its front end, the vertex of the angle being in the centre, and its rear end forming an inclined plane, as seen in fig. 2.

In the mortise *a* is pivoted the triangular block *b*, which is made in the shape of an equilateral triangle, so that by revolving the triangle, three different sizes or thicknesses of picks can be used with one handle, and the triangle will adjust itself to the bevel in the end of the mortise, and hold the pick with greater firmness than in the old method.

Having thus described my invention,

What I claim as new, and desire to secure by Letters Patent, is—

The handle A, provided with mortise *a*, in combination with the pivoted triangular block *b*, substantially in the manner and for the purpose described.

In testimony that I claim the foregoing as my own, I affix my signature in the presence of two witnesses.

Witnesses: NATHAN ROSE.
