# United States Patent Office.

MARY E. CAPEN, OF AURORA, ILLINOIS.

Letters Patent No. 93,517, dated August 10, 1869; antedated August 3, 1869.

## STOVE-ATTACHMENT.

The Schedule referred to in these Letters Patent and making part of the same.

*To all whom it may concern :*

Be it known that I, MARY E. CAPEN, of Aurora, in the county of Kane, and State of Illinois, have invented a new and useful article, "A Stove-Attachment, for cover-lifter and poker, and towel-drier combined;" and I do hereby declare and make known that the following is a full, clear, and exact description of the same, reference being had to the accompanying drawings, and the letters and figures marked thereon, which form a part of this specification.

The nature of my invention consists in the peculiar construction and arrangement of the several parts thereof.

To enable those skilled in the art to construct and use my invention, I will proceed to describe the same with particularity, making reference, in so doing, to the aforesaid drawings, in which—

Figure 1 is an entire view, as attached to the stove, and

Figure 2 is a side view of a single bracket.

A represents the back section of the upper plate of a common cooking-stove.

B, the stove-pipe.

C C, the two brackets.

*d d d d*, the hooks of the same, for the stove-cover lifter and poker.

*e e*, towel-rods, passing through the holes *f f f f*, in the brackets.

*g g*, thumb-screws, to attach the brackets to the plate of the stove.

The manner of using my invention is as follows:

Two brackets are clamped by thumb-screws to the upper plate of the stove, at the required distance apart, the rods passing through the holes in each bracket, to constitute the drier. If used only as a lifter and poker-hanger, one bracket only is requisite.

This invention is adapted to the back or sides of a stove, as persons using it may require.

Having described my invention, I will now specify what I claim, and desire to secure by Letters Patent.

I claim the stove-attachment shown, consisting of the brackets C, set-screw *g*, one or more perforations *f*, and one or more projections *d*, all constructed substantially as set forth, and for the purpose described.

MARY E. CAPEN.
