Inventor:

C W Sykes.

United States Patent Office.

CHESTER W. SYKES, OF SUFFIELD, CONNECTICUT.

Letters Patent No. 93,844, dated August 17, 1869; antedated August 13, 1869.

IMPROVED CARVING-DISH.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, CHESTER W. SYKES, of the town of Suffield, State of Connecticut, have invented an Improved Carving-Dish; and I do hereby declare the following to be a full and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon.

The nature of my invention consists in forming, on the inner surface of a carving-dish, points, or other projections, for the purpose of preventing meats and other edibles from changing position during the process of carving.

To enable others skilled in the art to make and use my invention, I will proceed to describe its construction and operation.

I construct my carving-dish with points projecting upward, as seen in sectional drawing, Figure 1, letters *a a a*, said points retaining the article to be carved in the desired position.

What I claim, and desire to secure by Letters Patent, is—

The points, or other projecting surfaces, upon the inner surface of a carving-dish, to retain, in the desired position, meats and other articles while being carved.

CHESTER W. SYKES.
