

United States Patent Office.

JOHN L. S. HALL, OF WHEELING, WEST VIRGINIA.

Letters Patent No. 94,819, dated September 14, 1869.

IMPROVED COMPOUND FOR CURING CORNS, BUNIONS, &c.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, JOHN L. S. HALL, of Wheeling, in Ohio county, and State of West Virginia, have invented a new and improved Application and Compound for the Cure and Removal of Corns, Bunions, Frosted Feet, Moles, Cancer, Warts, &c.; and I do hereby declare that the following is a full, clear, and exact description of the same and its application therefor.

My invention consists in the application of one or two drops of nitric acid to the corn, bunions, frosted part, mole, wart, &c., and then applying thereto the compound composed of the following ingredients, to wit:

Sulphate of ether, two fluidounces.
Spirits turpentine, two fluidounces.
Spirits camphor, two fluidounces.

Aqua ammonia, two fluidounces.
Tincture of arnica, half a fluidounce.
Olive oil, twelve fluidounces.

The mixing of which is effected by adding one to the other and gently shaking.

If one application of the above acid and compound does not effect a cure, repeat it until a complete cure is effected.

What I claim as my invention, and desire to secure by Letters Patent, is—

The application of nitric acid, in combination with the herein-described compound, in the manner and for the purposes herein set forth.

JOHN L. S. HALL.
