

UNITED STATES PATENT OFFICE.

MORITZ HOLST, OF MEMPHIS, TENNESSEE.

IMPROVEMENT IN MEDICAL COMPOUNDS OR BITTERS.

Specification forming part of Letters Patent No. 116,310, dated June 27, 1871.

To all whom it may concern:

Be it known that I, MORITZ HOLST, of Memphis, in the county of Shelby and State of Tennessee, have invented an Improved Medicinal Compound for the Cure of Ague; and I do hereby declare that the following is a full and exact description thereof.

The ingredients and proportions of the compound are as follows: Quinine or sulphate of quinia, one-half dram; spirits of niter, thirty drops; oil of turpentine, thirty drops; elixir of vitriol, thirty drops; oil of cloves, thirty drops; whisky, (best rye whisky preferred,) one-half pint. The above proportions are believed to be about the best; but a variation therefrom is ad-

missible without essentially impairing the efficacy of the medicine.

Dose for an adult, two table-spoonfuls three times a day before taking meals. For children the dose is one-half of the above quantity each time.

I claim as my invention—

The above-specified medicinal compound for the cure of ague, as set forth.

Specification signed by me this 29th day of March, 1871.

M. HOLST.
