UNITED STATES PATENT OFFICE.

CURTIS GODDARD, OF ALLIANCE, OHIO.

IMPROVEMENT IN COMBINED LINE-HOLDERS AND WARDROBE-HOOKS.

Specification forming part of Letters Patent No. 118,361, dated August 22, 1871.

To all whom it may concern:

Be it known that I, CURTIS GODDARD, of Alliance, in the county of Stark and State of Ohio, have invented certain Improvements in Line-Holders and Wardrobe-Hooks, of which the following is a specification:

My invention relates to the combination of a line-holder and wardrobe-hooks, as and for the purpose hereinafter described.

Figure 1 is a side elevation of my invention. Fig. 2 is a plan of the bed-plate of the same. Fig. 3 is a longitudinal section of the bed-plate. Fig. 4 is a longitudinal section of the pivoted lever and wardrobe-hook.

A is the bed-plate with aperture D C C, in which is inserted the vibrating lever B. Said lever has upon each side, at E, a short journal, which may be passed into the opening D, then forward and upward into the bearings C C. The journals are kept in their proper places by the part M of the lever B coming in contact with the surface on

which the bed-plate is fastened. The vibrating lever B is so constructed in connection with the plate A that by placing the cord or line in the aperture H, then drawing it into the wedge-shaped aperture I, then through the opening J, the line will be pressed and held firmly at H. The parts K K of the vibrating lever B are intended for and made of suitable shape and construction to be used as wardrobe-hooks.

I claim as my invention—

The combined line-holder and wardrobe-hook, consisting of the socketed bed-plate A and the journaled vibrating hook B, with the aperture H and the inclined surface I for holding the line, all cast in two parts, as shown and described, and for the purpose set forth.

CURTIS GODDARD.
