

UNITED STATES PATENT OFFICE.

EDOUARD EDMOND CRADY, OF SIOUX CITY, IOWA.

IMPROVEMENT IN BITTERS.

Specification forming part of Letters Patent No. 120,042, dated October 17, 1871.

To all whom it may concern:

Be it known that I, EDOUARD EDMOND CRADY, of Sioux City, in the county of Woodbury and State of Iowa, have invented a new and valuable Improvement in Compounds; and I do hereby declare that the following is a full, clear, and exact description of the same.

My invention relates to a new and useful compound or mixture; and it consists in combining and compounding a mixture or tonic of the following ingredients, which is designed to purify the blood and act as an invigorating medicine upon the general system.

I take twelve and one-half ounces of orange-peel; five ounces of gentian; two ounces and two scruples of cinnamon-bark; two ounces and

two scruples of star anise-seed; five drachms of cloves; five ounces of lemon-peel; five pints of simple sirup; twelve and one-half pints of spirits of wine; and twenty pints of distilled water.

These ingredients are mixed together and allowed to stand for two weeks, and then I percolate the extract off, when it is ready for use.

I claim as my invention—

The herein-described compound, composed of the ingredients named, substantially as and for the purpose set forth.

Sioux City, Iowa, June 9, 1871.

EDOUARD EDMOND CRADY.
