UNITED STATES PATENT OFFICE.

DANIEL SCHUYLER, OF TITUSVILLE, PENNSYLVANIA.

IMPROVEMENT IN STOVE-BOTTOMS.

Specification forming part of Letters Patent No. 121,667, dated December 5, 1871.

To all whom it may concern:

Be it known that I, DANIEL SCHUYLER, of Titusville, in the county of Crawford and State of Pennsylvania, have invented an Improved Stove-Bottom and Conductor, for the removal of ashes, of which the following in a specification, reference being had to the annexed drawing, in which—

Figure 1 is a general perspective view, and Fig. 2 a longitudinal section.

The object of my invention is to remove the ashes from a stove to the cellar, or other convenient place, without carrying them by hand in the usual manner.

For this purpose the stove-bottom B is perforated and fitted with the pipe P, which can be

continued to any place which it is desirable that the ashes should reach. The opening in the stove-bottom B is covered by the slide S, which is moved forward or backward by the handle H.

By drawing the slide S before raking the stove the ashes will fall to the desired place at the bottom of the pipe P.

I claim—

The combination of the perforated stove-bottom B with its slide S and handle H, together with the pipe P, substantially as and for the purposes above set forth.

DANIEL SCHUYLER.
