UNITED STATES PATENT OFFICE.

ERNEST U. KINSEY, OF PASSAIC, NEW JERSEY, ASSIGNOR OF ONE-HALF
OF HIS RIGHT TO W. N. KIP, OF SAME PLACE.

IMPROVEMENT IN SASH-HOLDERS.

Specification forming part of Letters Patent No. 126,216, dated April 30, 1872.

To all whom it may concern:

Be it known that I, ERNEST U. KINSEY, of Passaic, in the county of Passaic and in the State of New Jersey, have invented certain new and useful Improvements in Sash-Locks; and do hereby declare that the following is a full, clear, and exact description thereof, reference being had to the accompanying drawing and to the letters of reference marked thereon making a part of this specification.

My invention consists in the construction of a sash-lock composed of a box, a bolt, and a bent lever passing through a recess in the bolt and actuating it, and a weighted knob, all as more fully hereinafter described.

In order to enable others skilled in the art to which my invention appertains to make and use the same, I will now proceed to describe its construction and operation, referring to the annexed drawing, in which—

Figure 1 is a view of the inner side of my sash-lock, and Fig. 2 is an interior view of the same.

A represents a box of any suitable dimensions, within which moves horizontally the bolt B. This bolt is grooved on one side, and

a lever, C, passes through said groove, its upper end being pivoted or hung on a pin, *a*, and its lower end projecting through a slot in the lower part of the box. The lower end of the lever C is bent in the opposite direction from that at which the bolt is to operate, and upon its extreme end is a weighted knob, D. The weight of the knob forces out the bolt, and by this means I get rid of the spring now used, which is continually getting out of order.

Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The within-described sash-lock, consisting of the box A, bolt B, bent lever C passing through a recess in the bolt and actuating it, and the weighted knob D, all constructed and arranged substantially as set forth.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 24th day of January, 1872.

ERNEST U. KINSEY. [L. S.]
