# UNITED STATES PATENT OFFICE.

GILBERT HENRY PRINDLE, OF PHILADELPHIA, PENNSYLVANIA.

## IMPROVEMENT IN QUILTING AND SHAWL FRAMES.

Specification forming part of Letters Patent No. **132,177**, dated October 15, 1872.

*To all whom it may concern:*

Be it known that I, GILBERT HENRY PRINDLE, of the city and county of Philadelphia and State of Pennsylvania, have invented an Apparatus for the Manufacture of Spreads, Shawls, Scarfs, and other Apparel, &c., of which the following is a specification:

Figure 1 (letters A, B, and C) represents one piece, of which there are two of each to match, made entirely uniform, only of different sizes, each having a groove at E suitable for the ends of either to glide along to any size of fabric desired to be manufactured. F is metallic pins. Fig. 2 is the frame joined together ready for operation, the pieces being so arranged that they can be combined alternately to suit any size, length, and breadth, from a cap-string to a bed-quilt.

After the frame being joined together the proper size desired, the zephyr or yarn is wound to and fro across the frame, passing over and around two of those metallic pins till one course is completed, after which the process is continued in the same manner

lengthwise of the frame, and then again crosswise, until several courses are completed both ways and sufficient body or thickness is obtained. Each of these crossings is then tied with a fine thread or cord by means of a small shuttle, after which about ninety per cent. of the yarn midway from the crossings, both lengthwise and crosswise, is clipped with a pair of scissors. It then being rubbed with the hand in a circular motion, it forms a very handsome fringe ball at each crossing.

The object of my invention is to manufacture a very beautiful goods to apply to spreads, shawls, scarfs, tidies, hoods, fringe, muffs, leg-gings, and other apparel.

I claim as my invention—

The frame, consisting of the pieces B B C C, provided with the grooves E, substantially as and for the purpose set forth.

G. H. PRINDLE.
