UNITED STATES PATENT OFFICE.

WILLIAM EDGE, OF NEWARK, NEW JERSEY.

IMPROVEMENT IN BRACELETS.

Specification forming part of Letters Patent No. 133,146, dated November 19, 1872.

To all whom it may concern:

Be it known that I, WILLIAM EDGE, of Newark, in the county of Essex and State of New Jersey, have invented a new and useful Improvement in Bracelets, of which the following is a specification:

Figure 1 represents a portion of a bracelet illustrating my invention, part of the chainwork being broken away to show the construction. Fig. 2 is a cross-section of the same taken through the line $x \, x$, Fig. 1.

Similar letters of reference indicate corre-

sponding parts.

My invention has for its object to improve the construction of chain-work bracelets, so as to better adapt them for keeping their form when worn, while at the same time making them more beautiful and elegant in appearance; and it consists in a bracelet formed by turning the edges of a piece of chain-work down over the edges of a metallic plate, as hereinafter more fully described.

A represents the chain-work, which may be of any desired pattern, and about the construction of which there is nothing new. B is

a plate of gold, silver, or other suitable metal, which is placed upon the inner side of the middle part of the chain-work A, and the edges of said chain-work are turned down over it, as shown in Fig. 2. The edges of the chainwork A may overlap the inner side of the plate B less or more, or they may overlap it so as to meet, and thus entirely cover the said plate inside and outside, as may be desired.

By this construction the plate B not only gives form to the bracelets, but the burnished surface of the plate B, shining through the chain-work A, gives a beauty and elegance to the bracelet not otherwise obtained.

Having thus described my invention, I claim as new and desire to secure by Letters Pat-

An improved bracelet, formed by turning the edges of a piece of chain-work, A, down over the edges of a metallic plate, B, substantially as herein shown and described.

WILLIAM EDGE.
