

UNITED STATES PATENT OFFICE.

JOHN CONZELMAN, OF ST. LOUIS, MISSOURI.

IMPROVEMENT IN MEDICAL COMPOUNDS.

Specification forming part of Letters Patent No. **139,045**, dated May 20, 1873; application filed August 9, 1872.

To all whom it may concern:

Be it known that I, JOHN CONZELMAN, of St. Louis, Missouri, have invented certain new and useful Improvements in Medical Compounds, of which the following is a specification:

I take one ounce of glycerine and mix it with six drams of concentrated lemon extract; add half a dram of oil of sassafras dissolved in two drams of alcohol. After shaking well, add half a dram of carbolic acid, five drops of muriatic acid, thirty drops tincture ledum palustre, and one scruple of pulverized citric acid.

This mixture may be applied to the skin by mixing with lard, oil, or any other substance, or may be taken internally, the proportions of the different parts being varied as may be found desirable.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The medical compound composed of the ingredients above described, in or about the proportions set forth.

Witnesses: JNO. CONZELMAN.
JOHN A. HYNES,
OTTO VENN.
