UNITED STATES PATENT OFFICE.

SAMUEL A. POTTER, EMALINE POTTER, AND JOHN POTTER, OF FOWLER,
ILLINOIS.

IMPROVEMENT IN KETTLE-SCRAPERS.

Specification forming part of Letters Patent No. **150,482**, dated May 5, 1874; application filed
March 14, 1874.

To all whom it may concern:

Be it known that we, SAMUEL A. POTTER, EMALINE POTTER, and JOHN POTTER, of Fowler, Adams county, Illinois, have invented a new and Improved Kettle-Scraper, of which the following is a specification:

In the accompanying drawing, Figure 1 represents a top view of our improved kettle-scraper; and Fig. 2, a vertical longitudinal section of the same on the line *c c*, Fig. 1.

Similar letters of reference indicate corresponding parts.

The object of our invention is to furnish a convenient and handy device for scraping kettles, boilers, and similar utensils; and the invention consists in a scraper-plate with a round or otherwise-shaped rear handle at one side, and a pocket-guard for the fingers at the other side.

In the drawing, A represents the scraper-plate with a curved and sharpened edge, connected by stiffening side flanges *a* with the round, oval, or otherwise-shaped handle part B at the rear end, which is preferably formed by bending the extension of the scraper-plate into such shape for forming the support for

the thumb or palm of the hand, according as lighter or heavier work is to be performed. At the opposite side of scraper-plate A is attached the pocket-guard C for the insertion of the fingers, which, in connection with the thumb or palm, adapts the scraper to be held firmly during its work.

The scraper may be made of any suitable material, and in various sizes for different applications, and provided with a hinged ring, *b*, for hanging it to the wall out of the way after use.

Having thus described our invention, we claim as new and desire to secure by Letters Patent—

The kettle-scraper herein described, consisting of the scraper-plate A, handle B, and pocket or case C, all constructed and arranged substantially as herein shown, and for the purpose specified.

SAMUEL A. POTTER.
EMALINE POTTER.
JOHN POTTER.
