UNITED STATES PATENT OFFICE.

OMAR DAVIS, OF BOURBON, INDIANA.

IMPROVEMENT IN WASH-BOILERS.

Specification forming part of Letters Patent No. **167,748**, dated September 14, 1875; application filed February 23, 1875.

To all whom it may concern:

Be it known that I, OMAR DAVIS, of Bourbon, county of Marshall and State of Indiana, have invented an Improved Steam-Washer.

The following description, taken in connection with the accompanying plate of drawings hereinafter referred to, forms a full and exact specification, wherein are set forth the nature and principles of the invention, by which the same may be distinguished from others of a similar class, together with such parts thereof as are claimed as new and are desired to be secured by Letters Patent of the United States.

My invention relates to steam-washers; and the nature thereof consists in certain improvements in the details of the construction of the same, hereinafter shown and described.

In the accompanying plate of drawings, in which corresponding parts are illustrated by the same letters, Figure 1 is a plan view. Fig. 2 is a vertical section.

A designates a receiver, through which passes the tube B, through which the steam

and hot water is forced upward. Upon the top of the said receiver are arranged a series of supports, upon which rests the removable perforated plate C. The perforated chamber D rests upon the top of said receiver, and is rigidly attached thereto. Communication is established between said chamber and receiver by means of openings H.

Having thus described the construction and operation of my invention, I claim and desire to secure by Letters Patent of the United States—

The combination of the receiver A, provided with perforated chamber D, the tube B, and perforated plate C, substantially as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand this 20th day of January, 1875.

OMAR DAVIS.
