UNITED STATES PATENT OFFICE.

ALBERT S. WETMORE, OF CLEVELAND, OHIO, ASSIGNOR TO JOSEPH E. LAVEY, OF SAME PLACE.

IMPROVEMENT IN SUPPOSITORY-MOLDS.

Specification forming part of Letters Patent No. 170,975, dated December 14, 1875; application filed November 24, 1875.

To all whom it may concern:

Be it known that I, ALBERT S. WETMORE, of Cleveland, in the county of Cuyahoga and State of Ohio, have invented an Improved Suppository-Mold, of which the following is a specification:

This invention relates to a mold for molding suppositories; and consists of three leaves hinged together at one end in such a manner that the three may be opened separately. Each of said leaves has one-half the cavities cut in the side, and the central leaf has said cavities cut in both sides, said cavities being open at the edges of the leaves, and are arranged in two rows, and are constructed to make two sizes of suppositories.

These suppositories having come into quite general use, it is found necessary to devise means for producing them rapidly; hence the said invention.

To enable others to fully understand my invention, I proceed to describe the same in detail with the aid of the accompanying drawing, in which—

Figure 1 represents the mold closed. Fig. 2 represents the same opened.

A is the central leaf, to which the two outside leaves B C are attached by a hinge-joint, which consists of two lugs, D D, made on the central leaf, and projecting each side, and to which the two said outside leaves B C are pivoted. The central leaf has, in both of its faces, one-half of the conical cavities E E cut out from its edges inward, and in alternate rows and sizes, for economizing the spaces. The inside faces of the outer leaves B C have corresponding half-cavities cut in them, so that when the leaves are closed the cavities form the complete molds.

Having described my invention, I claim—

The suppository-mold herein described, consisting of the leaves A B C, each having the half-cavities E E cut in their faces, and hinged together as shown, and for the purpose set forth.

A. S. WETMORE.
