

UNITED STATES PATENT OFFICE.

WILLIAM J. GALT, OF STERLING, ILLINOIS.

IMPROVEMENT IN REMEDIES FOR HOG-CHOLERA.

Specification forming part of Letters Patent No. **178,756**, dated June 13, 1876; application filed March 18, 1876.

To all whom it may concern:

Be it known that I, WILLIAM J. GALT, of Sterling, in the county of Whitesides and State of Illinois, have invented a new and valuable Improvement in Hog-Cholera Compounds; and I do hereby declare that the following is a full, clear, and exact description of the same.

This invention relates to compounds which are designed for curing cholera in hogs; and the nature of my invention consists in a medical compound, which will be understood from the following formula, to wit: Sulphur, eight parts; antimony, four parts; sanguinaria, one part; capsicum, one part; Venetian red, one part; bole Armenian, one part.

These ingredients, preferably in the above proportions, are compounded or mixed together by the common means employed in compounding medical ingredients.

The Venetian red and the bole Armenian are especially efficacious in my improved compound; and while I prefer to adopt the proportions as set forth, these ingredients may be used in other proportions without departing from my invention.

What I claim as new, and desire to secure by Letters Patent, is—

The compound consisting of sulphur, antimony, sanguinaria, Venetian red, capsicum, and bole Armenian, in about the proportions set forth.

In testimony that I claim the above I have hereunto subscribed my name in the presence of two witnesses.

WILLIAM J. GALT.

Witnesses:

R. CHAMPION,
ALLEN R. HENDRICKS.
