# UNITED STATES PATENT OFFICE

KNUD THOMPSON AND LARS G. BERGSTROM, OF NORWALK, OHIO.

## IMPROVEMENT IN FAN ATTACHMENTS.

Specification forming part of Letters Patent No. **189,523**, dated April 10, 1877; application filed February 12, 1877.

*To all whom it may concern:*

Be it known that we, KNUD THOMPSON and LARS G. BERGSTROM, of Norwalk, in the county of Huron and State of Ohio, have invented a new and useful Fan Attachment for Rocking-Chairs; and we do hereby declare the following to be a full, clear, and exact description thereof.

Our invention consists in providing a rocking chair with an automatic-acting fan. Our invention is shown in the accompanying drawing, as follows:

Figure 1 is a side view of a rocking-chair with our device attached. Fig. 2 is a front view of the pendant and fan.

The construction of our device is as follows: A is a suspending-rod, and is detachably, if desired, attached to the back of the chair, and from thence reaches up and toward the front of the chair. B is a pendant, which attaches by a pin, *b*, to the front and upper end of the rod. Both the pendant and the rod are provided with a series of holes, *a a a*, by which the length of pendant below the rod and the distance of the pendant from the back of the chair can be regulated or adjusted.

At the lower end of the pendant is a fan, C, which may be rigidly or flexibly attached to the pendant.

The pendant swings easily on the pin *b*, and the slightest vibration of the chair will cause a vibration of the pendant, or a motion to the fan. It is intended that the length of pendant shall be so adjusted as to allow the fan to swing at a proper distance from the occupant of the chair.

What we claim as our invention is—

A fan attachment for rocking-chairs, having a rod, A, and pendant B, said parts being provided with holes *a a a*, and a pin, *b*, by which the position of the fan can be regulated, substantially as set forth.

In testimony whereof we, the said KNUD THOMPSON and LARS G. BERGSTROM, have hereunto set our hands.

KNUD THOMPSON.  
LARS G. BERGSTROM.
