UNITED STATES PATENT OFFICE.

LANSFORD F. WILDER, OF SUMNER, MICHIGAN.

IMPROVEMENT IN BOARD FENCES.

Specification forming part of Letters Patent No. **195,426**, dated September 18, 1877; application filed July 28, 1877.

To all whom it may concern:

Be it known that I, LANSFORD F. WILDER, of Sumner, in the county of Gratiot and State of Michigan, have invented a new and valuable Improvement in Portable Board Fences; and I do hereby declare that the following is a full, clear, and exact description of the construction and operation of the same, reference being had to the annexed drawings, making a part of this specification, and to the letters and figures of reference marked thereon.

Figure 1 is a side view of my portable fence. Fig. 2 is a detail view of my double hook for uniting the parts of the fence, and Fig. 3 is a perspective detail view.

The nature of my invention consists in the construction and arrangement of a portable fence, as will be hereinafter more fully set forth.

In the accompanying drawings, A A represent the panels of my improved portable fence, consisting of horizontal boards overlapping each other, and connected together by vertical boards B B'. The vertical end bars B of each panel project above it, and are connected together by a wire, I, hooked at its ends, and engaging with the projecting upper ends of the vertical boards B.

D D represent stakes inserted from opposite sides, and crossing each other between the two upper boards of the panel, their lower ends being inserted in the ground.

The stakes D D are connected together in pairs by means of a single rod, G', bent in the center to pass under one of the panel-boards, and provided with hooks at its ends, which engage with the stakes.

What I claim as new, and desire to secure by Letters Patent, is—

The overlapping fence-panels A A, provided with the central vertical boards B' and end vertical boards B, extending above the panels and connected by a removable wire, I, at their upper ends, in combination with the cross-stakes D D and rod G', bent at its middle, and provided with hooked ends, substantially as described, and for the purpose set forth.

In testimony that I claim the above I have hereunto subscribed my name in the presence of two witnesses.

LANSFORD F. WILDER.
