INVENTOR:

Napoleon LeBlond
per attys. A. H. Evans & Co.

UNITED STATES PATENT OFFICE.

NAPOLEON LE BLOND, OF FARMINGTON, MINNESOTA.

IMPROVEMENT IN ROSETTES FOR BRIDLES.

Specification forming part of Letters Patent No. **202,111**, dated April 9, 1878; application filed February 20, 1878.

To all whom it may concern:

Be it known that I, NAPOLEON LE BLOND, of Farmington, Dakota county, Minnesota, have invented a new and Improved Bridle-Rosette; and I hereby declare the following to be a full, clear, and exact description thereof, reference being had to the accompanying drawings, making part of this specification, in which—

Figure 1 is a perspective view of a bridle-rosette with my improvements attached. Fig. 2 is a section through *x x*.

My invention relates to rosettes for bridles; and it consists in the combination of devices hereinafter described and claimed.

In the drawings, A represents the foundation of the rosette, made of metal, leather, or other suitable material, and provided on its under side with the groove *a*, for the reception of one side of the metal slide B, to which is rigidly attached the screw *b*, which

passes through the center of the rosette and receives the cap C.

It is evident that the rosette may be removed at pleasure by simply unscrewing and removing the cap.

The groove *a* strengthens and supports the screw *b*, and prevents the bending or breaking of the same.

Having thus explained my invention, what I claim as new, and desire to secure by Letters Patent, is—

A bridle-rosette constructed as described, and consisting of foundation A, having the groove *a*, screw *b*, slide B, and cap C, as set forth.

Farmington, Dakota county, Minnesota,
February 13, 1878.

NAPOLEON LE BLOND.
