

UNITED STATES PATENT OFFICE

NARSICE SAILVAIL, OF WINSTED, MINNESOTA.

IMPROVEMENT IN LINIMENTS.

Specification forming part of Letters Patent No. **211,477**, dated January 21, 1879; application filed October 5, 1878.

To all whom it may concern:

Be it known that I, NARSICE SAILVAIL, of Winsted, in the county of McLeod and State of Minnesota, have discovered a certain new and useful compound for medicinal purposes, which compound is fully set forth in the following specification.

To one (1) gallon of alcohol I take five ounces (5 oz.) of the bark of the sumac; five ounces (5 oz.) of the bark of spikenard, (*Aralia racemosa*;) five ounces (5 oz.) of the bark of the tamarack, (*Larix Americana*;) three ounces (3 oz.) of the bark of prickly-ash, (*Xanthoxylum Americanum*;) three ounces (3 oz.) of bloodroot, (*Sanguinaria Canadensis*;) three ounces (3 oz.) of camphor-gum.

These are all placed in the alcohol in a close vessel and allowed to stand for eight or ten weeks, when the liquid is drawn off and bottled for use.

The medicine is used in the cure of burns, sprains, bruises, rheumatism, fever-sores, &c., as a liniment.

Having thus described my discovery, I claim as new and desire to secure by Letters Patent—

The medical compound consisting of sumac-bark, spikenard-bark, tamarack-bark, prickly-ash bark, bloodroot, camphor-gum, and alcohol, in or about the proportions hereinbefore specified.

In testimony whereof I have hereunto set my hand in the presence of two subscribing witnesses.

NARSICE SAILVAIL.

Witnesses:

C. N. WOODWARD,
LOUIS FEESER.
