

UNITED STATES PATENT OFFICE.

MARI BERGER, OF NEW YORK, N. Y.

LINIMENT.

SPECIFICATION forming part of Letters Patent No. 228,026, dated May 25, 1880.

Application filed December 3, 1879.

To all whom it may concern:

Be it known that I, MARI BERGER, of the city, county, and State of New York, have invented a new and Improved Compound Liniment, which invention is fully described in the following specification.

This invention relates to compound liniment for the cure of rheumatism and kindred ailments; and it consists in a mixture of oil of juniper, oil of henbane, (hyoseyamus,) laurel-oil, pine-oil, oil of burdock, oil of rhododendrum chrysanthemum, oil of ants, spirits of camphor, and walnut-leaf oil.

The method of preparing the oil of burdock is well known; and it consists in soaking the burdock in linseed-oil, or other oil, to obtain an extract therefrom. The walnut-leaf oil described is not a nut-oil, being obtained by soaking the leaves of the walnut-tree in oil.

In carrying out my invention, I take about equal parts of these ingredients and mix the

same together in a cold state, when the compound is ready for use.

This compound forms a liniment which is very efficacious in curing rheumatism and other similar diseases.

What I claim as new, and desire to secure by Letters Patent, is—

A compound liniment consisting of oil of juniper, oil of henbane, laurel-oil, pine-oil, oil of burdock, oil of rhododendrum chrysanthemum, oil of ants, spirits of camphor, and walnut-leaf oil, mixed together in the proportions specified, for the purpose set forth.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 17th day of November, 1879.

MARI BERGER. [L. S.]
