

# UNITED STATES PATENT OFFICE.

GEORGE W. BANKER, OF BROOKLYN, NEW YORK.

## MANUFACTURE OF OIL.

SPECIFICATION forming part of Letters Patent No. 255,096, dated March 21, 1882.

Application filed December 12, 1879.

*To all whom it may concern:*

Be it known that I, GEO. W. BANKER, of Brooklyn, in the county of Kings and State of New York, have invented new and valuable  
5 Improvements in a Composite Oil for Lubricating, &c., of which the following is a specification.

Since the introduction of petroleum and its products for lubricants, leather-dressing, and  
10 other purposes, attempts have been made to combine such oils with castor-oil; but no satisfactory nor inexpensive mode of permanently combining castor-oil with mineral oils has heretofore been discovered and made known to the  
15 public.

My discovery consists in the use of corn-oil for combining castor-oil with heavy oil produced from petroleum or paraffine in nearly equal proportions.

What I claim is—

The herein-described composite oil, composed of castor-oil, corn-oil, and heavy oil produced from petroleum or paraffine oil, in nearly equal proportions.

GEO. W. BANKER.

Witnesses:

GEO. W. PECK,  
DAVID THORNTON.
