# UNITED STATES PATENT OFFICE.

CROWELL S. MACANN, OF RAHWAY, ASSIGNOR OF ONE-HALF TO ALEXANDER COOK, OF NEWARK, NEW JERSEY.

## TICKET-HOLDER FOR CAR-SEATS.

SPECIFICATION forming part of Letters Patent No. 274,621, dated March 27, 1883.

Application filed May 12, 1882. (Model.)

*To all whom it may concern:*

Be it known that I, CROWELL S. MACANN, a citizen of the United States, residing at Rahway, in the county of Union and State of New Jersey, have invented a new and useful Improvement in Railroad-Ticket Holders, of which the following is a specification.

The nature of my invention consists in an attachment to the back of the seat of a railroad passenger-car for holding the ticket of a passenger within sight of the conductor, and also in front of and in sight of the passenger.

In the accompanying drawings, which form a part of this specification, Figure 1 is a vertical section of the reversible back of a railway-car seat of sufficient width for two passengers, with my improvement attached thereto, which improvement is shown in section at A A, &c., Fig. 1. The attachment is shown in vertical longitudinal section in Fig. 2, in which the springs B B B, that press onto and hold the ticket, are shown.

Fig. 3 is a vertical cross-section of the ticket-holder, showing the ticket C inserted, being held

by the springs B B B against the beveled-edged bed D. E is the housing or cover which protects the springs B B B from injury, which cover, together with the bed D, is fastened to the back of the seat, in the manner shown in Fig. 1, by means of screws F F, &c. As a substitute for the springs B B B, rubber may be used, of such thickness as to allow the ticket to pass between the under side of the rubber and the upper side of the beveled-edged plate D.

What I claim as my invention, and desire to secure by Letters Patent, is—

The above-described device, (as an improvement in ticket-holders adapted to be permanently attached to the back of a car-seat,) consisting of the beveled-edged plate D, provided with springs B B B, as shown, in combination with a cover or housing, E, all arranged as shown and described.

CROWELL S. MACANN.
