UNITED STATES PATENT OFFICE.

LAZARUS HOFFMAN, OF COLUMBUS, OHIO.

GLOVE OR MITTEN.

SPECIFICATION forming part of Letters Patent No. 280,823, dated July 10, 1883.

Application filed May 29, 1882. (No model.)

To all whom it may concern:

Be it known that I, LAZARUS HOFFMAN, a citizen of the United States; and residing in the city of Columbus, county of Franklin, and State of Ohio, have invented certain new and useful Improvements in Gloves or Mittens; and I do hereby declare that the following is a full, clear, and exact description of the same, reference being had to the accompanying drawings, in which—

Figure 1 represents a glove embodying my invention; Fig. 2, a leather glove of the ordinary construction; Fig. 3, a mitten of leather, and of the ordinary construction; and Fig. 4 a mitten constructed in accordance with my invention.

The object of the present invention is to provide a glove or mitten that will take the place of the ordinary leather ones, and will possess greater strength and durability, and, there being no seams, will not rip; and the invention

therefore consists in a glove or mitten formed of leather twine, as hereinafter described.

In the accompanying drawings, A represents a glove, and B a mitten, formed of a leather twine, *a*, either knit or crocheted into the proper form, thus combining the wearing durability of the ordinary leather glove or mitten with the elasticity and pliability of the common knit or crochet glove or mitten of cotton or woolen yarns or thread.

Having now fully described my invention, what I claim as new, and desire to secure by Letters Patent, is—

As an improved article of manufacture, a glove or mitten formed of leather cord or twine, substantially as and for the purpose set forth.

LAZARUS HOFFMAN.
