

UNITED STATES PATENT OFFICE.

GEORGE W. SCOTT, OF DEFIANCE, OHIO.

EYE-WATER.

SPECIFICATION forming part of Letters Patent No. 284,335, dated September 4, 1883.

Application filed March 8, 1883. (Specimens.)

To all whom it may concern:

Be it known that I, GEORGE W. SCOTT, a citizen of the United States, residing at Defiance, in the county of Defiance and State of Ohio, have invented a new and useful Medical Compound, of which the following is a specification.

This invention relates to medical compounds for the treatment of diseases and affections of the eye; and it consists of the following ingredients, which are compounded in about the proportions specified, viz: Sulphate of iron, three ounces; sulphate of copper, three ounces; sulphate of zinc, three ounces; alum, three ounces; rose-water, two ounces; sulphate of morphia, one-fourth dram; hydrastis canadensis, one-half ounce; pure soft water, one quart. These ingredients are to be thoroughly mixed, and then bottled for use.

This preparation is to be used to bathe the

eye, and can be diluted with water, the quantity being governed according to the nature and severity of the affection. In serious cases it may not be necessary to dilute it at all, and it will act to secure rapid relief to the patient.

I claim as my invention—

The herein-described medical compound for the treatment of diseases of the eye, comprising sulphate of iron, sulphate of copper, sulphate of zinc, alum, rose-water, sulphate of morphia, hydrastis canadensis, and pure water, all compounded in about the proportions specified.

In testimony that I claim the foregoing as my own I have hereto affixed my signature in presence of two witnesses.

GEORGE W. SCOTT.

Witnesses:

HENRY HARDY,
I. E. WELLMAN.
