UNITED STATES PATENT OFFICE.

MERIDETH P. CURLEE, OF PERDUE HILL, ALABAMA.

PLOW.

SPECIFICATION forming part of Letters Patent No. 302,472, dated July 22, 1884.

Application filed July 11, 1883. Renewed June 18, 1884. (No model.)

To all whom it may concern:

Be it known that I, MERIDETH P. CURLEE, a citizen of the United States, residing at Perdue Hill, in the county of Monroe and State of Alabama, have invented certain new and useful Improvements in Plows, of which the following is a specification, reference being had therein to the accompanying drawings.

10 This invention relates to certain improvements in plows; and it has for its objects to provide an improved mold-board and cutter for the same, as more fully hereinafter specified. These objects I attain by the means illustrated in the accompanying drawings, in which—

Figure 1 represents a side elevation of my improved plow, and Fig. 2 a view partly in section and partly in elevation of the same.

20 The letter A indicates the plow-beams, and B the handles, to one of which is secured a pointed shoe of iron, (indicated by the letter C.) The iron has welded to it a plowshare, D, which at its rear is provided with a tongue, E, which interlocks in a recess at the lower end of the wooden mold-board F.

25 The letter G indicates a glass mold-board,

which sets over the wooden mold-board, the two mold-boards being secured to their seats by means of the bolts H.

30 The letters H' and I indicate braces, which are applied to the parts of the plow to impart rigidity to the same.

The letter K indicates a cutter, which is hinged in a recess in a section, L, secured to the plow-beam, and is braced to said beam by means of a rod, M, as indicated. 35

The operation of my invention will be apparent from the above without further description. 40

What I claim, and desire to secure by Letters Patent, is—

The combination, in a plow, of the curved wooden mold-board, having a facing of glass of similar configuration, and the metallic plow-share, the whole being secured together by suitable connections, substantially as specified. 45

In testimony whereof I affix my signature in presence of two witnesses.

MERIDETH P. CURLEE.
