

UNITED STATES PATENT OFFICE.

GEORGE W. BANKER, OF BROOKLYN, NEW YORK.

COMPOSITE OIL FOR LUBRICATING, &c.

SPECIFICATION forming part of Letters Patent No. 305,782, dated September 30, 1884.

Application filed March 14, 1884. (No specimens.)

To all whom it may concern:

Be it known that I, GEORGE W. BANKER, of Brooklyn, in the county of Kings and State of New York, have invented new and valuable Improvements in Composite Oils for Lubricating, &c., of which the following is a specification.

Since the introduction of petroleum and its products for lubricants and other purposes attempts have been made to combine such oils with castor-oil, (which, for slow-running and heavy machinery, is considered superior to other oils;) but no satisfactory way of combining mineral oils with castor-oil was discovered until my composite oil was produced and patented, March 21, 1882, No. 255,096.

The object of my invention is to produce a composite oil as a new article of commerce,

with which castor-oil will combine in varying proportions, so that the consumer, being supplied with this composite oil and castor-oil, may combine the two in such proportions as is best adapted for slow or rapid running, light or heavy, machinery.

My discovery consists of combining corn-oil with mineral oils in nearly equal proportions.

What I claim is—

The herein-described composite oil, composed of corn-oil and mineral oils in nearly equal proportions.

GEO. W. BANKER.

Witnesses:

GEORGE W. PECK,
FRED. W. KENNY.
