

UNITED STATES PATENT OFFICE.

OLIVER F. BROWN, OF LEXINGTON, KENTUCKY, ASSIGNOR OF ONE-HALF TO
A. FARRA, OF SAME PLACE.

LINIMENT.

SPECIFICATION forming part of Letters Patent No. 415,020, dated November 12, 1889.

Application filed July 15, 1889. Serial No. 317,586. (No specimens.)

To all whom it may concern:

Be it known that I, OLIVER F. BROWN, a citizen of the United States, residing at Lexington, in the county of Fayette and State of Kentucky, have invented certain new and useful Improvements in Liniments; and I do hereby declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it appertains to make and use the same.

This invention relates to that class of medical compounds which are designed for external application for the relief of pain, for reducing swelling and inflammation caused by bruises, sprains, fractures, &c.; and its object is to provide a compound suitable for all emergencies to which liniment is adapted, and particularly for the treatment of live stock.

To this end my invention consists in a medical compound which is composed of the following ingredients: tincture of aconite, (radix,) two ounces; tincture of belladonna, two ounces; tincture of opium, two ounces; chloroform, two ounces; spirits of camphor, one ounce; spirits of turpentine, one ounce; oil of sassafras, two ounces—making in all twelve ounces of liniment. A statement of

the various uses to which it is applicable and directions for its application would accompany it in whatever form of bottles it may be sold. I will, however, state that this liniment is for external application, and should never be used internally. It may be applied full strength upon ringbone, splint, swellings, or old wounds; but for fresh wounds—such as cuts, bruises, or chafed places—and particularly when applied on a cloth or bandage, it should be diluted with five times its volume of water. Shake it before using.

Having thus fully described my invention, what I believe to be new, and desire to secure by Letters Patent, is the following:

A medical compound consisting of the following ingredients: tincture of aconite, tincture of belladonna, tincture of opium, chloroform, spirits of camphor, spirits of turpentine, and oil of sassafras, combined in substantially the proportions described.

In testimony whereof I affix my signature in presence of two witnesses.

OLIVER F. BROWN.

Witnesses:

AARON FARRA,
JESSE WOODRUFF.
