# UNITED STATES PATENT OFFICE.

ISAAC T. BROWN, OF COLUMBUS, INDIANA.

## NAPKIN-HOLDER.

SPECIFICATION forming part of Letters Patent No. 481,161, dated August 23, 1892.

Application filed July 20, 1891. Serial No. 400,187. (No model.)

*To all whom it may concern:*

Be it known that I, ISAAC T. BROWN, a citizen of the United States, residing at Columbus, in the county of Bartholomew and State of Indiana, have invented a new and useful Napkin-Holder, of which the following is a specification.

My invention relates to an improved napkin-holder.

10 The object of my improvement is to provide a cheap and simple device for attaching a napkin to the vest or coat front.

The accompanying drawings illustrate my invention.

15 Figure 1 is a view in perspective of my improved napkin-holder. Fig. 2 is a view in perspective showing the holder applied to a napkin.

20 The holder consists of a straight bar A, bent at each end at right angles to the bar, then doubled upon itself in the same plane, so as to form a pair of short handles B B, and then bent in planes at right angles to the handles B to form a pair of pointed hooks C C.

In operation the hooks C are passed through 25 the edge of the napkin D, as illustrated in Fig. 2, thus bringing the bar A below the edge of the napkin and holding it smoothly extended. In applying the holder and napkin to the vest-front the handles B are seized 30 between the thumb and forefinger of each hand, the hooks C being turned toward the body and then inserted in the vest-front.

I claim as my invention—

The above-described napkin-holder, consisting of the straight bar A, bent downward 35 at each end at right angles, then doubled upon itself in parallel planes, so as to form the pair of short handles B B, and then bent in planes at right angles to the handles to 40 form a pair of pointed hooks C C, all as shown and described.

ISAAC T. BROWN.
