UNITED STATES PATENT OFFICE.

DESIDERIUS SIEGFRIED KÁNN, OF WEINBERGE, AUSTRIA-HUNGARY,
ASSIGNOR TO ARTHUR FREUND, OF PRAGUE, AUSTRIA-HUNGARY.

CAPSULE FOR MEDICINES.

SPECIFICATION forming part of Letters Patent No. 710,060, dated September 30, 1902.

Application filed June 11, 1902. Serial No. 111,224. (No model.)

To all whom it may concern:

Be it known that I, DESIDERIUS SIEGFRIED KÁNN, a subject of the Emperor of Austria-Hungary, residing at Kgl. Weinberge, near
5 Prague, in the Kingdom of Bohemia and Empire of Austria-Hungary, have invented a new and useful Improvement in Capsules for Medicinal Purposes; and I do hereby declare the following to be a full, clear, and exact description
10 of the invention, such as will enable others skilled in the art to which it appertains to make and use the same.

It is well known that in order to do away with the moistening of the edges of capsules
15 the so-called "dry-closing" capsules were introduced.

The object of the present invention is the production of a dry-closing capsule for medicinal purposes which consists of two cup-
20 shaped parts, one with a double wall, the parts being capable of being introduced one into the other.

In the accompanying drawings, Figure 1 shows the parts of the capsule separated.
25 Fig. 2 shows the capsule closed or made up.

The essential feature of this capsule con-

sists in providing one half with a double wall *c*, in which the second half *b* is secured after being introduced therein.

It must be noted that the fuller the capsule
30 and the heavier the charge with which it is filled the better will be the closure, as the inner side of the double wall *c* of the half *a* is pressed against the second half *b*, thereby forming a perfectly-safe closure and afford-
35 ing all the advantages of a dry-closing capsule.

Having now described my invention, what I claim as new, and desire to secure by Letters
40 Patent, is—

As a new article of manufacture, a dry-closing capsule, consisting of two cup-shaped parts capable of being introduced one within the other, one of said parts having a double
45 wall within which the other part engages, substantially as described.

In witness whereof I have hereunto set my hand in presence of two witnesses.

DESIDERIUS SIEGFRIED KÁNN.
