No. 780,524.

Patented January 24, 1905.

UNITED STATES PATENT OFFICE.

HENRY O. PUTNAM, OF SUNFIELD, MICHIGAN.

BOAT FOR MOVING PLOWS.

SPECIFICATION forming part of Letters Patent No. 780,524, dated January 24, 1905.

Application filed April 15, 1904. Serial No. 203,388.

To all whom it may concern:

Be it known that I, HENRY O. PUTNAM, a citizen of the United States, residing at Sunfield, in the county of Eaton and State of Michigan, have invented a new and useful Boat for Moving Plows, of which the following is a specification.

My invention relates to a boat for moving plows on and about the farm, of which the following is a specification, reference being had to the accompanying drawing.

The figure is a perspective view.

A represents two metal runners joined together at point or front end and curving up at point.

B represents wood running from curve to back end of runner on left-hand runner for right-hand plows, runners being reversed for left-hand plows. C represents a corresponding wood on right-hand runner, which is about three-fourths the length of left-hand runner.

D represents cross-bar for holding plow at point, said bar being bent at its ends to form a vertical and an inclined projection. E represents a corresponding cross-bar for holding plow at back end of plow.

What I claim, and desire to secure by Letters Patent of the United States, is—

A sled comprising angularly-disposed runners joined and upwardly curved at their forward ends, said runners having two transverse cross-bars each provided with a vertical and an inclined terminal projection whereby a plow may be attached thereto substantially as set forth.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

HENRY O. PUTNAM.
