UNITED STATES PATENT OFFICE.

ANSON L. SONN, OF TROY, NEW YORK.

BRUSH.

No. 821,894.

Specification of Letters Patent.

Patented May 29, 1906.

Application filed May 27, 1905. Serial No. 262,535.

To all whom it may concern:

Be it known that I, ANSON L. SONN, a citizen of the United States of America, and a resident of the city of Troy, county of Rensselaer, and State of New York, have invented certain new and useful Improvements in Brushes, of which the following is a specification.

My invention relates to brushes; and the object of my invention is to provide a brush in which the bristles are secured to the brush-back in a positive and secure manner and present a neat and tasty appearance and which shall be inexpensive in construction and serviceable in operation. I attain these objects by means of the mechanism illustrated in the accompanying drawings, in which—

Figure 1 is a plan; Fig. 2, a longitudinal section along the lines X X on Fig. 1.

Similar letters refer to similar parts throughout both views.

Upon the brush-back A, I place a plate C, containing a series of openings through which the bristles D project, and onto the ends of the bristles within plate C, I place the composition E, plate C being provided along its edge with the downwardly-projecting flange G, which is forced into the brush-back A,

thus holding the plate and bristles securely and positively in contact with the brush-back.

I thus provide a brush which is very inexpensive in construction, there being no routing out of the brush-back, the bristles are held securely in position, and the plate C being embedded in the brush-back prevents any displacement of the composition, prevents the same from falling away from the brush-back, and makes a very attractive and durable brush.

What I claim as my invention, and desire to secure by Letters Patent, is—

The combination of a substantially flat brush-back; a plate having openings for bristles; a flange around the edge of said plate; composition placed upon said brush-back; bristles being embedded in said composition and passing through said openings in said plate; the flange on said plate being embedded in the brush-back.

Signed at Albany, New York, this 24th day of May, 1905.

ANSON L. SONN.
