

UNITED STATES PATENT OFFICE.

PHILIP JOSEPH SHAFFER, OF SPRINGFIELD, ILLINOIS.

COMPOSITION OF MATTER FOR CLEANING AND SHINING WOOD.

961,903.

Specification of Letters Patent. Patented June 21, 1910.

No Drawing.

Application filed March 28, 1910. Serial No. 551,922.

To all whom it may concern:

Be it known that I, PHILIP JOSEPH SHAF-
FER, a citizen of the United States, residing
at Springfield, in the county of Sangamon
and State of Illinois, have invented a new
and useful composition of matter to be used
for the cleaning and shining of any kind of
wood, as woodwork or millwork in a house,
hard-wood floors, furniture, oil-cloth, cellu-
loid, rubber, and linoleum, of which the fol-
lowing is a specification.

My composition consists of the following
ingredients combined in the proportions
stated, viz: 768 ounces paraffin oil (pure),
348 ounces benzin, 192 ounces vinegar, 64
ounces turpentine. These ingredients are to
be thoroughly mingled by agitation.

In using the above-named composition, a
piece of cloth, preferably cheese cloth, should
be used in applying it freely to the wood or
article desired to be cleaned and polished.
This will remove the dirt from the wood and

also remove ordinary scratches. Then a
couple of seconds after said composition has
been applied the article should be rubbed
lightly but briskly. This will give the ar-
ticle a bright, shiny glossy appearance.

I claim:

1. The herein described composition of
matter, consisting of paraffin oil, benzin, vin-
egar and turpentine, substantially as de-
scribed for the purpose specified.

2. The herein described composition of
matter for cleaning and polishing wood, oil-
cloth, celluloid, rubber and linoleum con-
sisting of seven hundred sixty eight ounces
pure paraffin oil, three hundred and forty-
eight ounces benzin, one hundred and ninety
two ounces of vinegar and sixty four ounces
of turpentine as substantially described.

PHILIP JOSEPH SHAFFER.

Witnesses:

JAMES Y. KELLY,
OSCAR J. PUTTING.
