United States Patent Office.

JONATHAN SMITH EATON, OF BOSTON, MASSACHUSETTS.

Design No. 3,727, dated October 26, 1869.

DESIGN FOR COVERING TRUNKS.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, JONATHAN SMITH EATON, of Boston, county of Suffolk, and State of Massachusetts, have invented and produced a new and original Design for Covering for Trunks, of which the following is a specification, reference being had to the accompanying drawings.

My object is to produce a cheap imitation of trunk patented by me January 7, 1868. The trunk then patented was covered with strips of wood. This construction makes a very superior trunk, but expensive. Now, as the style is desirable, I have found that a paper covering, in imitation of my patent trunk, would be desirable also.

The drawings represent, in—

Figure 1, a trunk covered with paper, in imitation of my trunk covered with wood strips.

Figure 2 represents a sheet of imitation covering. The covering is made to represent wood laid on in strips.

The form of trunk shown in fig. 1 is simply for example.

What I claim as my invention, and desire to secure by Letters Patent, is—

The design for an imitation covering for trunks, as shown and described.

In testimony whereof, I have signed my name to this specification, in the presence of two subscribing witnesses.

JONATHAN SMITH EATON.
