ELBRIDGE J. STEELE, OF NEW BRITAIN, ASSIGNOR TO SARGENT & CO., OF  
NEW HAVEN, CONNECTICUT.

## DESIGN FOR TWINE-HOLDER.

Specification forming part of Design No. 7,578, dated July 21, 1874; application filed June 3, 1874.  
[Term of Patent 14 years.]

*To all whom it may concern:*

Be it known that I, ELBRIDGE J. STEELE, of New Britain, in the county of Hartford and State of Connecticut, have invented a new Design for Twine-Holder; and I do hereby declare the following, when taken in connection with the accompanying drawing and the letters of reference marked thereon, to be a full, clear, and exact description of the same, and which said drawing constitutes part of this specification, and represents a perspective view.

This invention relates to a design for a box or case for holding a ball of twine; and it consists in the peculiar configuration and ornamentation of the case, as shown in the accompanying illustration, and more fully hereinafter described.

The general outline transversely is circular. The base is of ogee-form, around the upper edge of which stand a succession of columns, connected at the top by intersecting arches, drawing in to form a dome-shaped top, all as shown in the accompanying illustration.

I claim as my invention—

The design for twine-holder, consisting of the base, vertical columns standing thereon, and connected at their upper ends by intersecting arches in dome form, as shown in the accompanying illustration and hereinafter described.

ELBRIDGE J. STEELE.
