UNITED STATES PATENT OFFICE.

WARREN P. JENNINGS, OF BROOKLYN, NEW YORK.

DESIGN FOR A FRINGED LACE FABRIC.

Specification forming part of Design No. **10,418**, dated February 12, 1878; application filed January 9, 1878.
[Term of patent 7 years.]

To all whom it may concern.

Be it known that I, WARREN P. JENNINGS, of Brooklyn, Kings county, New York, have invented a new and original Design for Fringed Lace Fabric, of which the following is a specification.

The accompanying photograph illustrates a face view of my new design.

This invention relates to a new looped fringe applied in series to lace fabrics.

A represents the lace fabric of usual kind. B B are the disconnected fringes applied thereto. Each fringe B is formed with loops at both sides of a central stem or rib, along its

entire extent, as shown, thus producing a peculiar, full, and yet loose effect. The fringes are arranged in series of rows and suspended from the lace fabric.

I claim—

The design for a lace fabric provided with disconnected doubly-looped fringes B, having loops at both sides of a central stem or rib, substantially as shown.

WARREN P. JENNINGS.
